ECONOMY LOCKOUT CENTER

This **Economy Lockout Center** is made of acrylic and is great for small businesses or larger plants that need multiples to place near the machines to be locked out. Four holes make it easy to wall mount, too.

Part No	Description
43799BY	Economy Lockout Center

Center Contents:

(6)	Multi-Color Padlocks	(1)	1" Multiple Lockout Device
(10)	Lockout Tags w/ Ties	(1)	1½" Multiple Lockout Device

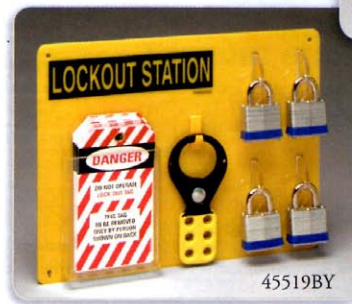

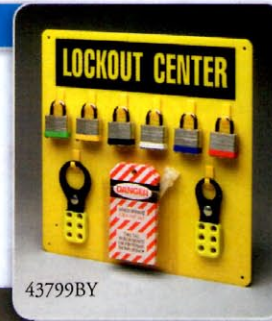

LOCKOUT COMPLIANCE STATION

This **Lockout Compliance Station** is made from heavy-duty acrylic board with polycarbonate lock retention hooks. Workers can keep padlocks here when they're not in use.

Part No	Description
45519BY	Lockout Compliance Station

Station Contents:

(4)	Padlocks, Blue
(10)	Lockout Tags w/ Ties
(1)	1½" Multiple Lockout Device

ECONOMY LOCKOUT KIT - SIGN AND RACK

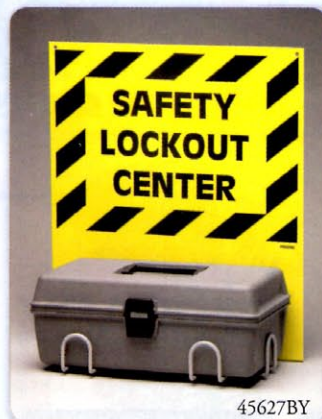

Economy Lockout Kit comes with everything needed, and all at an affordable price, to make sure equipment is de-energized or locked out in accordance with OSHA regulation 1910.47. All pieces contained in a rugged carrying case. Also purchase the sign and rack separately.

Part No	Description
45627BY	Economy Lockout Kit & Mounting Rack
45618BY	Economy Lockout Kit
45621BY	Sign and Rack Only

Kit Contents:

(3)	Blue Padlocks	(1)	Large Plug Lockout
(14)	2 Padlock Identifier Stickers	(1)	Lockout Training Booklet
(1)	10 Pack Lockout Tags With Ties	(1)	Sign and Rack
(3)	Single Pole Breaker Lockouts	(1)	Heavy-Duty Polyethylene Carrying Case, 7"H x 12"W x 5"D
(2)	Multi-Pole Breaker Lockouts		
(3)	1½" Steel Lockout Hasps		

PRINZING INDUSTRIAL STRENGTH LOCKOUT STATION

Industrial Strength Lockout Station starts with a metal powder-coated cabinet. Inside is an adjustable shelf. Lockout safety tips on the inside of the cabinet door provide reminders of proper lockout procedures. Lockout station is wall mountable or portable. Cabinet is part of the lockout station but can also be purchased on its own. 16"H x 14"W x 6"D.

SAFETY PADLOCKS

Brady® Safety Padlocks are the ultimate locks for safety and security needs. The unique cylinder is insulated to protect workers from shocks when key is inserted. And, padlocks are six-pin precision-machined for more unique key cuts and better tamper resistance. Locks are compact and lightweight, plus they resist impact, temperature, chemicals and corrosion. And, the non-conductive, non-sparking bodies feature ribbed designs for easy gripping and handling. Locks measure 1 3/4"H x 1 1/2"W x 3/8"D with 1 1/2" x 1/4" shackle and come with one key.

LABELED LOCKOUT HASPS

Labeled Lockout Hasps are constructed from tough, anodized aluminum with tamperproof locking tabs. These hasps are impossible to remove while locks are still in place. Front and back of hasp contain a write-on surface that accepts pencil, pen or permanent marker. Pen and pencil markings can be easily erased, allowing for repeated use. Each hasp has six lock holes ($\frac{5}{16}$ " Dia.) and reads "DANGER DO NOT OPERATE ... ETC" (front), and "DANGER - This energy source has to be LOCKED OUT ... ETC" (back). Hasp measures $7\frac{1}{4}$ "H x 3"W x $\frac{3}{16}$ "D. Red.

Part No	Description
65960BY	Labeled Lockout Hasps, 5/Pkg

65960BY

LOCKOUT HASPS

Lockout Hasps are ideal for group lockout situations. Yellow **Hasps** are constructed of epoxy-coated, 12-gauge steel for superior resistance to rust and added dielectric strength. A yellow plastic coating is added to the lock area for better visibility too. Red **Hasp** is constructed of vinyl-coated, high-tensile steel with resistant plating.

BUTTERFLY VALVE LOCKOUTS

Butterfly Valve Lockouts are made of strong polypropylene plastic that is highly resistant to cracking and abrasion. Fully dielectric and resistant to extreme temperature changes (-50°F to 360°F). Red.

Part No	Description
BS04RNS	Butterfly Valve Lockout, Universal

BS04RNS

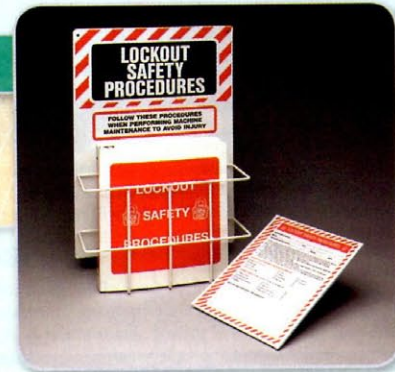

FACILITY SAFETY

An Effective Energy Control Program Is Only 4 Steps Away

STEP 1

Create Energy Control Policy And Procedures

- This is one of the most critical – and overlooked – components of a LO/TO program!

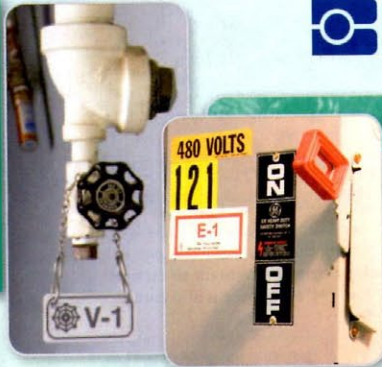

FACILITY SAFETY

STEP 2

Identify All Energy Control Points

- Reduce the time it takes to perform lockout and avoid isolating the wrong energy sources by identifying all control points.
- Pages 240-241 provides solutions for labeling or tagging valves, switches, breakers, etc.

STEP 3

Equip Employees With The Proper Lockout Tools And Warning Devices

- Brady has OSHA-compliant locks, tags and lockout devices to cover every application. See pages 246-247 for locks, pages 239-241 for tags, and pages 248-249 for devices.
- It is equally important to ensure that lockout tools are properly stored and readily accessible to those who need them. Lockout kits and stations do just that, and can be found on pages 243-245.
- Make sure other employees are aware when LO/TO activity is in progress. Warning tape and barricades are shown on pages 264-271.

STEP 4

Train Employees And Promote Awareness Of Safe Work Practices

- OSHA requires that employees be trained in accordance with their specific roles and responsibilities.
- Information on training requirements, posters and other instructional aids can be found on page 256.

65965BY

CLAMP-ON BREAKER LOCKOUTS

For use on single-pole and internal-trip multi-pole breakers, these **Clamp-On Breaker Lockouts** are easy to install – simply tighten the lockout securely onto the switch tongue, pull the cover over the thumbscrew and lock the cover to prevent the clamp from loosening. Accepts lock shackles up to 3/8" diameter. Made of rugged polypropylene and impact-modified nylon. Lock not included. Red.

Part No	Description
65965BY	Clamp-On Breaker Lockouts, 120/277V, 6/Pkg
