The Start of Something

GENESIS X2™

The great thing about **Genesis X2™** safety eyewear is that it's so comfortable it's possible to forget you're wearing them. Protection is rarely this simple or stylish. These sporty specs have wraparound lenses that offer side protection and uninhibited peripheral vision. Ratcheting temples allow for customization of the lens inclination. Nose pads are soft with finger-like structures that grip for a non-slip fit. Choice of frame and lens color. Meets military V₀ ballistic test and ANSI Z87+ standards for impact.

GENESIS XC™

With the same features as **Genesis®** (see page 39), **Genesis XC™** goes one step further by extending the wraparound lens to provide about 20% more side coverage. There's also a lens insert available for those who wear prescription glasses. **Genesis XC** safety glasses have the same comfort and adjustability as **Genesis** with several lens colors and coating choices. Meets military V₀ ballistic test and ANSI Z87+ standards for impact.

FLEX SEAL® GOGGLES

Often the problem with wearing goggles is that they're uncomfortable, distort or block vision and can fog up. Uvex® Flex Seal® Goggles work to change all that. Their silicone construction provides long lasting comfort, fit and climate adaptability. Goggles fit over most prescription frames, protecting eyes – even on the periphery. Flex Seal® seals out dust, particles and harsh chemicals. Pivoting headband clip requires less tension to maintain a snug fit so fewer headaches from tight bands. Optically correct polycarbonate lens has Uvextreme® anti-fog coating plus indirect venting system. Passes ANSI Z87+ impact standards.
