

# CATÁLOGO EPP - Prot. Respiratoria

### SAF-T-FIT® FLAT FOLD PARTICULATE RESPIRATORS

Latex free Saf-T-Fit® Flat Folds protect mouth and nose from particulate aerosols. The boomerang nose clip bends to create a custom fit and is color-coded for size. Folds flat to store and springs open easily for use. Choose with or without valve.

PPE

### HC-NB295F FLAT FOLD SURGICAL RESPIRATORS

HC-NB295F Surgical Respirator is disposable and comes pre-packaged for cleanliness. Flat fold respirators have a soft inner layer for the wearer's comfort. Latex- and silicone-free construction with elastic headstraps. Provides 99.9% bacterial, 95.5% particle and 99.9% viral filtration efficiency.

14110451SN

Part No	Description
14110451SN	HC-NB295F Disposable Flat Fold Surgical Respirator, 20/Box

### ONE-FIT™ W1400 N95 FLAT FOLD PARTICULATE RESPIRATORS

One-Fit™ W1400 Particulate Respirators may come in a universal size but the wire nose clip helps adjust it to the wearer's facial features. Lightweight and soft, yet tough against M. tuberculosis and other pathogens. Flat fold saves storage space and offers cooler breathing, too.

14110452SN

Part No	Description
14110452SN	W1400 Disposable Flat Fold, N95, 20/Box

### PFR95\* N95 RESPIRATOR MASKS

PFR95\* Respirator Masks are designed in a pouch-style for added comfort. These N95 regular size masks have a large breathing chamber and provide a minimum of 95% filtration efficiency of .3 microns.

Part No	Description
62126KC2	Respirator Masks, Pouch Style, 6 Boxes/50 ea

### KIMTECH PURE\* M3 POUCH-STYLE MASKS

Formerly known as PCM 2000\*, the M3 Pouch-Style Mask provides excellent bacterial and particle filtration. A large breathing chamber makes breathing easier and cooler. Masks are held in place with two knitted headbands. Recommended for ISO Class 3 or higher cleanroom environments.

Part No	Description
62484KC2	M3 Pouch Style Masks, 6 Boxes/50 ea

## PPE

**ONE-FIT™ NBW95 & NBW95V MOLDED CUP PARTICULATE RESPIRATORS**

One-Fit™ Molded Cup Particulate Respirators have a shape that better fits the contours of the face. The outer shell is rigid so the mask stays open even in humid environments. These respirators provide 95% filtration against solid particulates and non-petroleum based aerosols. Two head straps hold mask in place.

**ADVANTAGE® 4000 FACEPIECE**

The Advantage® 4000 Facepiece from MSA is a one-mask system that adapts to a variety of respiratory applications. Available in single-port and twin-port models, it works with air-purifying respirators, supplied-air respirators and powered air-purifying respirators. The benefits to employers are more simplified fit tests, cost-savings and reduced inventory. The Advantage 4000 Facepiece works with three different interfaces: Push-to-Connect (PTC), RD40 and the Twin-Cartridge Adapter. Other options include either a rubber or net harness, and every mask comes with a standard nosecup for reduced fogging in low-temperature or high-moisture environments. Comes in three standard sizes and is suitable for every industry from agriculture and asbestos abatement to nuclear and welding. Filters out nuisance odors, particles, dust and any other non-IDLH toxic atmospheres. Cartridges sold separately.

**ADVANTAGE® 3200 AIR-PURIFYING RESPIRATOR**

The Advantage® 3200 Air-Purifying Respirator, from industry leader MSA, is designed to lower breathing resistance, while the nose cup reduces fogging. Plus, the optically correct facepiece lens has been engineered to eliminate distortion and deliver superior visibility with excellent peripheral vision. And, the Advantage Facepiece provides a tight, secure seal, yet remains comfortable to wear. Donning the mask is easier, too, with MSA's new adjustable straps. Once preset, don and doff the mask without any uncomfortable snags. Cartridges sold separately.
