

CATÁLOGO EPP - Trajes

KLEENGUARD® A20 COVERALLS

KLEENGUARD® A20 Coveralls are made from Microforce® Barrier SMS, a breathable fabric that provides improved barrier protection on submicron-size particles for a perfect combination of protection and comfort. The tough, durable, cloth-like outer layer is an abrasion-resistant, spunbond polypropylene and the middle layer is an intricate web of microfibers that filter out light, water-based liquids and dry particulates. The coveralls are ideal for maintenance and general clean-up work, including asbestos handling, lead abatement and fiberglass operations. They may also be used in laboratories, pharmaceuticals, food processing and other manufacturing operations.

KLEENGUARD® A30 COVERALLS

KLEENGUARD® apparel is made from a heavier, abrasion-resistant fabric so it's more durable. Plus, the patented **MicroForce® Barrier** fabric gives these coveralls superior filtering properties – keeping out many water-based liquids as well as dry particulates. Of course, extra protection is always good; extra protection with comfort is better. And, that's one reason **KLEENGUARD® A30** makes a great choice for many uses – in manufacturing, aerospace, food processes, agriculture, electronics and general cleanup and maintenance, including asbestos handling, lead abatement and mold remediation. White.

KLEENGUARD® A60 COVERALLS

KLEENGUARD® A60 Coveralls come in two styles depending on the level of protection you need – with zippered front and storm flap or with a hood and boots. The 3-layer fabric construction has a middle layer of microporous film, which allows heat and sweat to escape, while still guarding against dry particulates and liquids. Coveralls pass ASTM F1670/1671 testing for penetration of blood, body fluids and bloodborne pathogens. Blue.

Note:

When selecting chemical protective clothing, it's important to be sure the garment offers adequate resistance to the chemicals being handled in your workplace.

KLEENGUARD® A65 FLAME RESISTANT COVERALLS

Flame-resistant and anti-static, KLEENGUARD® A65 Coveralls are made from fabric that's breathable and durable enough to resist tearing. Coveralls comply with several flame resistant requirements including paragraph 6.1 of CAN/CGSB-155.20-2000 and NFPA 701 Flame Propagation Test. They're also compliant with NFPA 99 for anti-static material. Blue.

NOTE: KLEENGUARD A65 Coveralls should not be used as primary fire protection. They are designed for wearing in areas where sparks are possible.
