MS4F

FIRE ALARM CONTROL PANELS – CONVENTIONAL

Fire-Lite's® MS2F and MS4F FIRE ALARM CONTROL PANELS bring the latest in microprocessor technology to conventional fire controls. They are compatible with the **i3™** smoke detectors from **System Sensor®** (see page 120), which provide such advanced features as drift compensation, maintenance alert and freeze warning. Automatic synchronization of audio/visual devices is provided using the **System Sensor, Wheelock or Gentex** protocol.

P/N	DESCRIPTION
MS2F	FACP, 2-Zone, Style B, 24VDC, 1 Style Y NAC
MS4F	FACP, 4-Zone, Style B/D, 24VDC, 2 Style Y/Z NAC
DDPCAC4F	Class A Converter for IDC & NAC MS4F Only
DDP4XTMF	Remote Station or Municipal Box Output MS4F Only
DDP4XLMF	Annunciator Driver Supports DDPRA4XF, MS4F Only
DDPRZA4XF	Annunciator, 4 Alm & 1 Tbl LED Requires DDP4XLMF, MS4F Only
DDP4XZMF	Relay Module, 4-Zone, Alm & Tbl Relays MS4F Only
XRM24F	NAC Power Expander, 3 to 6A MS4F Only

MS5UDF, MS10UDF w/ ANN80F

Smaller facilities like banks, grocery stores, restaurants, strip malls and more, can benefit from **Fire-Lite's® FIVE-ZONE and TEN-ZONE PANELS**, which bring the latest technology to conventional panels. A built-in keypad with 80-character LCD display makes it fully programmable without the need for an external programmer. There's a built-in **Digital Alarm Communicator Transmitter (DACT)** as well, plus they're compatible with **System Sensor® i3™** smoke detectors, providing advanced features like drift compensation, maintenance alert and freeze warning. The **Notification Appliance Circuit (NAC)** synchronization protocol has the ability to silence audible alarms as well, while the strobes continue to flash, using just a single pair of wires.

P/N	DESCRIPTION
MS5UDF	FACP 5z 2NAC CL B w/ DACT
MS10UDF	FACP 10z 2NAC CL B w/ DACT
ANN80F	80-Character LCD Serial Annunciator
DDPCAC5XF	Class A Converter Module
DDP4XTMF	Remote Station or Municipal Box Output, 24VDC

DDPMRP2001F

For commercial, industrial and institutional buildings that require releasing service, **Fire-Lite's® SIX-ZONE PANELS** – for single and dual applications – are more than up to the task. The **DDPMRP-2001F** is for deluge and pre-action applications, while the **DDPMRP-2002F** handles the agent releasing applications. Both panels are compatible with **System Sensor's® i3™** detectors and transmit a maintenance trouble signal to the **FACP** when it needs cleaning. There's also a supervisory 'freeze' signal when the ambient temperature falls below the detector rating (approximately 45°F). Panels are also compatible with input devices like two-wire or four-wire smoke detectors, pull stations, waterflow devices and tamper switches.

P/N	DESCRIPTION
DDPMRP2001F	6-Zone FACP, Deluge & Pre-action
DDPMRP2002F	6-Zone FACP, Agent Release
ANN80F	80-Character LCD Serial Annunciator
DDPCAC5XF	Class A Converter Module
DDP4XTMF	Remote Station or Municipal Box Output, 24VDC

This addressable **FIRE ALARM CONTROL PANEL**

(FACP), by Fire-Lite® Alarms, supports up to 50 addressable devices and includes a built-in **Digital Alarm Communicator/Transmitter (DACT)** in the same circuit board – making it both compact and cost effective. The **MS9050UDF** may be connected to an 80-character fire annunciator for remote annunciation and control of system functions too, including **System Acknowledge**, **Signal Silence**, **Drill** and **Reset**. The **FACP** also features audio/visual device synchronization using **System Sensor®**, **Wheelock** and **Gentex** protocol.

P/N	DESCRIPTION	1-2	3-5	6+
MS9050UDF	Fire Alarm Control Panel w/ DACT			
ANN80F	80-Character LCD Serial Annunciator			
DDP4XTMF	Remote Station or Municipal Box Output, 24VDC			
DDPPKCDF	Upload/Download Software			

MS9050UDF w/ ANN80F

This combination **FIRE ALARM CONTROL PANEL** and **DIGITAL ALARM COMMUNICATOR/TRANSMITTER** is a cost-effective, addressable control panel with many powerful features. It operates in **LiteSpeed™** mode, giving it a quicker response time, so panels with the maximum 198 devices can report an incident fast – under 10 seconds. And, there's selectable strobe synchronization for **System Sensor®**, **Wheelock** and **Gentex** devices.

P/N	DESCRIPTION	1-2	3-5	6+

DDPPKCDF	Upload/Download Software			

MS9200UDLSF

The **Fire-Lite® MS9600LSF ADDRESSABLE FIRE ALARM CONTROL PANEL** supports up to 318 addressable devices on each of two signaling line circuits (second **SLC** optional). Offering, **LiteSpeed™**, a patented technology that polls 10 devices at once, allowing a fully loaded panel to report an incident and activate the notification circuits in under 10 seconds using standard twisted, unshielded wire. The new panel supports the low-cost **ANN-BUS**, legacy **ACS** annunciation devices for retrofit applications and a host of other features including built-in **NAC** synchronization. Easily installed, programmed and maintained, the **MS9600LSF** is ideal for use in schools, assisted living facilities, office buildings, malls, etc.

MS9600LSF

For the Earliest Warning Possible

VLF500

The **Xtralis® Vesda® LaserFocus® DETECTOR** is a very early warning smoke detector designed to protect small, business-critical environments of less than 500 m2 (5,000 sq. ft.) The detector works by continually drawing air through sampling holes in a pipe network. The air is filtered and passed into a detection chamber where extremely small amounts of smoke are detected, while rejecting dust and other sources of false alarms.

P/N	DESCRIPTION	EACH
VLF500	LaserFocus 500	1,707.38

VPS100US120

Xtralis® POWER SUPPLIES. The **VPS100US120** is capable of providing 24VDC with battery backup for the **VLF500 LaserFocus®** smoke detector. Batteries not included.

VIC020

The **Xtralis® Vesda® VIC020 MCC (MULTI-FUNCTION CONTROL CARD)** is an interface card for the range of **Xtralis Vesda VLF** smoke detectors. Installing a **VLF MCC** into a **VLF** detector provides a cost-effective solution for customers who need enhanced connectivity, fault detection and monitoring, and annunciation of alarms and faults. The principal benefits include improved **FACP** connectivity. The **VLF** is fitted with two alarm relays in its standard form. With an extra two relays, the **Multi-function Control Card** allows reporting of all four alarm levels on dry relay outputs.

P/N	DESCRIPTION	EACH
VIC020	Relay Expansion Card	

PIPE AND ACCESSORIES

Both the 15' and 7 1/2' lengths of 3/4" **Vesda® PIPE** are imprinted with "Smoke Detector Sampling Tube - DO NOT DISTURB" along their lengths, on opposite sides, at 18" intervals.

ADDRESSABLE DETECTORS AND ACCESSORIES

Fire-Lite's® 300 SERIES ADDRESSABLE, LOW-PROFILE, PLUG-IN SMOKE DETECTORS use a state-of-the-art sensing chamber with communications to provide open area protection. They are used exclusively with **Fire-Lite's Addressable Fire Alarm Control Panels**. Since these detectors are addressable, they will help emergency personnel quickly locate a fire during its early stages, potentially saving precious rescue time and reducing property damage. Two LEDs on each sensor will light to provide a local, visible sensor indication. Remote LED annunciator capability is available as an optional accessory (**RA100Z**, see below).

P/N	DESCRIPTION	1-4	5-9	10+

The **Fire-Lite® D355PLF ADDRESSABLE DUCT SMOKE DETECTOR** features a pivoting housing that fits both square and rectangular footprints and mounts to round or rectangular ductwork. This unit senses smoke in the most challenging conditions, operating in airflow speeds of 100 to 4,000 feet per minute, temperatures of -4°F to 158°F and a humidity range of 0% to 95% (non-condensing). A plug-in sensor head offers improved false alarm immunity and simple installation, testing and maintenance. An improved cover design isolates the sensor head from the low-flow feature for simple maintenance.

DUCT01

Portable, Easy to Use

When you want a **DUCT DETECTOR TEST TOOL** that's portable and easy to use, grab the **Ductchecker™**. This battery-operated device tests the pressure and air sampling ability of duct detectors. Testing of this type should be done once a year as required by NFPA 72 to make sure the duct detector is sampling the airstream properly. The **Ductchecker** comes with sampling tube plugs and a hard case to protect the tool from damage. 9V alkaline battery included.

P/N	DESCRIPTION	EACH
DUCT01	Ductchecker Duct Detector Test Tool	

ADDRESSABLE MODULES AND ACCESSORIES

Fire-Lite's® 300 Series ADDRESSABLE MONITOR and CONTROL MODULES provide an interface to conventional **Initiating Device Circuits (IDC)** and **Notification Appliance Circuits (NAC)** respectively. Modules are addressed with easy-to-use rotary code switches too, and are used exclusively with **Fire-Lite's Addressable Fire Alarm Control Panels**. And since these modules are addressable, they provide the flexibility to meet the requirements of most installations.

P/N	DESCRIPTION	1-4	5-9	10+

Fire-Lite's® state-of-the-art, dual-action **PULL STATION** includes an addressable interface (mounted inside) for **Fire-Lite's Addressable Fire Alarm Control Panels**. Because the **BG12LXF** is addressable, the control panel can display the exact location of the activated manual pull station, allowing fire service personnel to locate the alarm quickly. The dual-action design requires two motions to activate the station, reducing the risk of an accidental alarm.

SMOKE DETECTORS AND ACCESSORIES

System Sensor's® i3™ Series PHOTOELECTRIC SMOKE DETECTORS are founded on three principles: installation ease, intelligence and instant inspection. Installation ease is redefined by the simple **Stop-Drop 'N Lock** action plug-in base. Intelligent features, such as **Drift Compensation** and **Maintenance Alert**, simplify testing and maintenance. Instant inspection of the detector's condition is accomplished by wide-angle red and green LED indicators.

HEAT DETECTORS

The **5600 SERIES MECHANICAL HEAT DETECTORS** offer a low-cost means for property protection against fire and non-life-safety installations, where smoke detectors are inappropriate. Detectors easily mount to single-gang and octagonal backboxes. Plus, a reversible mounting bracket makes flush- or surface-mount backbox installations a breeze. Detectors also feature clear markings for proper detector selection and alphanumeric characters for identifying activation method and temperature rating, in both Fahrenheit and Celsius.

Test Heat Detectors Solo™

Providing a solution that is second to none for testing heat detectors, the cordless **Solo™ 461 HEAT DETECTOR TESTER** with the revolutionary and patented **CAT™** (Cross Air Technology) system focuses the air and directs it at the sensor not the plastic components or casing, regardless of the detector's shape and size, making it the most advanced tester currently in the market. Offering the fastest functional test possible in the safest and most controlled way, the **Solo 461** tester uses rechargeable (NiMH) batteries with minimal battery weight, no wires, standby mode for protection and battery conservation and a targeted, focused beam of heat that enables tests to be carried out quicker with detectors rapidly activated. Safe for use at low level or at heights up to 30 ft with the **Solo** access poles and suits fixed temperature and rate of rise and combination detectors up to 194°F. Includes two **Battery Batons™** and fast charger (operates from 110/120, 220/240V AC supply or 12VDC car battery).

For horns, strobes and horn/strobes with hi-tech features, including easy installation, choose **System Sensor's® SpectraAlert® ADVANCE SELECTABLE OUTPUT NOTIFICATION DEVICES**. The plug-in design is simple to install. Just attach the universal mounting plate to a 4" junction box. Then connect the notification appliance circuit wiring to the **SEMS** terminals on the mounting plate. Finally, attach the horn, strobe or horn/strobe to the mounting plate. The device will rotate into position and hold until it is secured with the capture mounting screw. **SpectraAlert Advance** products work on 12 or 24 volts. The horn is rated at 88+ dB. The **P2RHK120** model is UL listed for outdoor use and can operate in extreme temperatures (-40°F to 151°F) in either wet or dry conditions. All **SpectraAlert Advance** sensors are electrically compatible with existing **SpectraAlert** products.

The **DH Series FIRE DOOR HOLDERS** are constructed using the finest materials and best workmanship available. The door holder is made of durable die-cast metal finished in high-luster, powder-coated chrome. Extremely low current draw saves on power supplies and back-up batteries. Installation is easy and the adhesive template (included) assures proper alignment without secondary adjustments. Other models that offer alternative voltages and finishes, including Brass or Dark Bronze, are available. Contact a Sales Representative for more information.

DHE4AC	Door Holder, 4" Adjustable Extension Rod			

INSPECTION, TESTING & MAINTENANCE PRODUCTS

Solo™ SMOKE and HEAT DETECTOR TESTING TOOLS offer a professional solution to NFPA 72 Inspection, Testing and Maintenance requirements. The **SOLO808 Starter Kit** provides the equipment necessary to test smoke detectors on ceilings up to 12', while the **SOLO809** version increases ceiling access up to 20'. And, the **DDPSOLO461 Heat Detector Testing Kit** has everything you need to successfully test heat detectors fast and easy, as does the **TRUTEST Sensitivity Tester System** for measuring the real sensitivity of smoke detectors as required by the National Fire Code. As for **SOLOA4 Aerosol**, it uses a nonflammable, ozone-friendly; low-residue formula to provide UL listed and manufacturer-endorsed simulated smoke. For hand-held applications, choose **CHEKKIT** which uses the same detector-friendly formula, but in a 6-ounce can.

→ **More SMOKE AND HEAT DETECTOR TESTING TOOLS Available - Call for Pricing.**

SMOKESABRE® is a major step forward in the design of smoke detector test aerosols. When extended, the patented design more effectively vaporizes the aerosol providing better detector activation while using less gas per test. Plus, the **Sabre** prevents the aerosol from being sprayed too close to the detector solving the issue of residue build up that plagues other brands of canned smoke. **SmokeSabre** contains no silicon, is UL listed and uses a bio-degradable plastic, making it both recyclable and eco-friendly.

P/N	DESCRIPTION	1-11 12+
SMOKESABRE	Smoke Detector Tester, 3 oz	

CANNED AIR is non-flammable, non-residual and non-abrasive with zero ozone depletion potential. **Canned Air** is moisture free and delivers over 80 psi of pressure. Great for cleaning smoke alarms, panels and office equipment. Comes with plastic delivery tube for hard-to-reach places.

DM73C

Brooks' MULTI-METER is as versatile as it is compact. This unit will measure both AC and DC current and determine continuity of lamps. Unit also has a display locking feature for added convenience.

P/N	DESCRIPTION	EACH
DM73C	Compact Multi-Meter	

The **DBchecker™** is a **SOUND LEVEL METER** that tests audible appliances for the public operating mode of an emergency voice/alarm system. Easy to use, it conforms to ANSI S1.4 Type 2, which is required by NFPA 72. Measuring levels range from 32 dB to 130 dB, at frequencies between 31.5 Hz to 8 Hz. Unit has two equivalent weighted sound pressure levels, A and C and displays with a resolution of 0.1 dB on a four-digit LCD screen. 9V alkaline battery included.

P/N	DESCRIPTION	EACH
DB01	DBchecker Sound Level Meter	

DB01

DUCT01

When you want a **DUCT DETECTOR TEST TOOL** that's portable and easy to use, grab the new **Ductchecker™**. This battery-operated device tests the pressure and air sampling ability of duct detectors. Testing of this type should be done once a year as required by NFPA 72 to make sure the duct detector is sampling the airstream properly. The **Ductchecker** comes with sampling tube plugs and a hard case to protect the tool from damage. 9V alkaline battery included.

P/N	DESCRIPTION	EACH
DUCT01	Ductchecker Duct Detector Test Tool	

CELL03

Cellchecker™ LEAD ACID PULSE LOAD BATTERY TESTER

provides a comprehensive test of a battery's state of charge and condition. With accurate pulse load testing, it tests the battery's ability to deliver current and to maintain voltage under load – not just voltage or internal resistance. The LED indicates percentages of remaining battery capacity, too. With a fast test time (15 seconds), this tester is easy to use, battery safe (does not damage or drain the battery) and produces accurate results on new, partially discharged and stored batteries.

P/N	DESCRIPTION	EACH
CELL03	Cellchecker Lead Acid Pulse Load Battery Tester

21006376

21006379

Kidde HARD-WIRED SMOKE ALARMS can be operated as a single station unit or interconnected with up to 12 **Kidde** smoke alarms on one wiring system. Comes with a 10-year limited warranty

PN	DESCRIPTION	1-11	12+
21006374	Ionization, Basic, Smart Button, Smart Hush, Silent Hush, Alarm Memory, PVC Material (Replaces 1235)		
21006378	Ionization, Battery Back-Up, Smart Button, Smart Hush, Silent Hush, Alarm Memory, PVC Material (Replaces 1275, 1275EH)		
21006376	Ionization, Battery Back-Up, 9V, Front Loading Battery Door, Smart Hush, Silent Hush, Alarm Memory, PVC Material (Replaces 1276)		
21006379	Ionization, Exit Light, Battery Back-Up, Smart Hush, Silent Hush, Alarm Memory, PVC Material (Replaces 1285E)		
SM120X	Relay Power Supply Module		

NEW FEATURES

- **Smart Button** – one button does it all (Test and Hush).
- **Smart Hush®** – will temporarily silence nuisance alarms and will not allow hush to be activated unless unit is in alarm.
- **Silent Hush®** – will not chirp while in hush mode.
- **Alarm memory** with battery run down protection. Originating alarm flashes red LED, which will shut off to conserve the battery if AC power is not present and the battery voltage drops below 8V.
- Styling features non-yellowing, rigid PVC material.

IONIZATION/PHOTOELECTRIC SENSOR SMOKE

ALARMS from **Kidde** feature both an ionization and photoelectric sensor providing the best protection for your home. It is capable of interconnecting with up to 12 **Kidde** smoke alarms on one wiring network. The **Hush®** feature also temporarily silences nuisance alarms. Comes with a 10-year limited warranty. Batteries included.

P/N	DESCRIPTION	1-11	12+
21007915	AC Powered Ionization/Photoelectric Sensor Smoke Alarm w/ Battery Back-up		
442007	9V Ionization/Photoelectric Smoke Alarm		

The **9120B IONIZATION SMOKE ALARM** has been designed to install faster, perform better and be even smarter than before. These improvements help reduce nuisance alarms and save you time and money. Comes with a 10-year limited warranty. Batteries included.

P/N	DESCRIPTION	EACH
9120B	120VAC Ionization Smoke Alarm w/ Battery Backup	

The **BRK® PHOTOELECTRIC SMOKE ALARM** features a photoelectric smoke sensing chamber, an 85 dB horn, single button test/silence, a Green LED power light and a Red LED that indicates the unit is in alarm. Unit includes patented **OptiPath 360 Technology™** for improved performance. Add this relay module for "Smart Interconnect" **BRK** CO alarms. The form-C contacts, once connected, automatically activate whenever the alarm sounds and will deactivate when the alarm shuts off. Meets UL 317, UL2034 and UL539 for accessories. Comes with a 10-year limited warranty.

P/N	DESCRIPTION	1-11	12+
7010	120VAC Photoelectric Smoke Alarm		
RM4	BRK Form-C Relay Module		

PHOTOELECTRIC SMOKE ALARMS from **Kidde** are excellent for providing early detection against smoke and fire, especially slow, smoldering fires. Alarms feature a low battery indicator and a Comes with a 10-year limited warranty. Batteries included.

SL177I

In an emergency, this **Kidde AC POWERED STROBE LIGHT** will give hearing-impaired family members or coworkers the visual sign they need to evacuate the building. This bright light flashes to warn them of smoke, heat or carbon monoxide dangers. Since these devices have no detectors, they must be used in addition to existing operating alarm systems. Five-year limited warranty.

P/N	DESCRIPTION	EACH
SL177I	Strobe Light for Hearing Impaired	

710LC

HEARING IMPAIRED SMOKE ALARM meets ADA and UL 1971 requirements. These units come equipped with a patented three-position functional test switch with pulsing LED sensing chamber and solid state LED condition indicator. The **710LC** is equipped with a 9' line cord that lets you instantly equip any room with a 177 candela visual and 90 dB audible signal, all-in-one device. The **7109CSW** is hardwired and has a 9V battery back-up with audible low-battery chirp, along with tandem connection for up to six detectors per system. One-year limited warranty. NOTE: Strobe light on the 7109CSW will not function while operating on battery only.

P/N	DESCRIPTION	EACH
710LC	Smoke Alarm for Hearing Impaired w/ 9' Cord	
7109CSW	Smoke Alarm for Hearing Impaired, Hard-Wired, w/ 9V Battery Back-Up	

CARBON MONOXIDE ALARMS

Kidde's NightHawk™ Deluxe CARBON MONOXIDE

ALARM is a direct plug, wall mount and table-top unit with 6' cord. The Consumer Product Safety Commission recommends only alarms that meet UL standard 2034, such as **NightHawk** carbon monoxide alarms. Five-year limited warranty. Battery included.

P/N	DESCRIPTION	EACH
NHDELUXE	120VAC Direct Plug, Carbon Monoxide Alarm w/ 9V Battery Back-Up	

Kidde's NightHawk 9000234 AC POWERED, PLUG-IN CARBON MONOXIDE ALARM has a 40% longer life than other CO alarms! It comes with a 9V battery (included) backup and a digital display for continuous easy viewing. The digital display also adds an advanced level of protection by allowing you to see changes in CO levels in PPM. The new unit even lets you know if it's been unplugged or has come loose from the outlet. Other features include a **Peak Level Button**, **Test/Reset Button** and an **End of Life Alarm**, alerting you when it's time to replace the unit. Seven-year limited warranty.

P/N	DESCRIPTION	EACH
9000234	120VAC Plug-In Carbon Monoxide Alarm	

The battery powered **CARBON MONOXIDE ALARM** from **Kidde** provides early warning via a permanent electro-chemical sensor. Unique features include Red and Green diagnostic lights, battery status and sensor health. Five-year limited warranty.

P/N	DESCRIPTION	EACH
COPB	DC Carbon Monoxide Alarm w/ 3 AA Batteries	

This **Kidde CO/GAS COMBINATION ALARM** provides double the protection – detecting CO and explosive gases, like methane or propane. It even has a 9V battery back-up in case the lights go out. It's easy to install too; just plug it in to any AC wall outlet. Other features include a continuous digital display showing detected levels of carbon monoxide and a loud 85 dB pulsing alarm that sounds if a problem is detected. Five-year limited warranty. Battery included.
